

What can I do with **Finance?**

Fi

What is Finance

Finance is the study of the management of money, investments, and other financial instruments. It involves the allocation of funds to various projects and the management of risk. Finance is a key component of business and economics, and it plays a central role in the functioning of modern economies. The field of finance is divided into several sub-disciplines, including corporate finance, investment banking, and financial markets. Finance is a dynamic and ever-evolving field, and it offers a wide range of career opportunities for individuals with a strong interest in money and business.

Applied learning

Applied learning is a teaching approach that focuses on the practical application of knowledge and skills. It involves learning through direct experience, such as internships, simulations, and hands-on projects. This approach helps students develop the critical thinking and problem-solving skills needed in the workplace.

What do employers look for?

- Communication skills
- Teamwork

- Project monitoring and control
- Project communication
- Project risk management
- Project quality management
- Project stakeholder management
- Project team management
- Project resource management
- Project budget management

How can these skills be developed?

These skills can be developed through a combination of formal education, experiential learning, and self-directed learning. Formal education provides a structured environment for learning theory and concepts. Experiential learning, such as internships and simulations, allows students to apply their knowledge in real-world situations. Self-directed learning involves seeking out resources and opportunities to learn on one's own, such as through online courses, workshops, and networking.
