

Phonological awareness assessment probes for preschool children

Instructions

Rhyme Detection

“We are going to play a game with rhyming words. Cat and hat are rhyming words, boat and goat are rhyming words. Rhyming words sound a bit the same. Here is my friend clown He doesn't like rhyming words so we are going to give him all the words that don't rhyme. We will give him all the words that don't sound alike. Let's try some together.

Fish dish ball which word doesn't rhyme? Incorrect response.

Fish and dish sound alike they rhyme. Ball doesn't rhyme. It doesn't sound like fish or dish so we will give ball to the clown.

Pig hat bat which one doesn't rhyme? (which one doesn't sound the same?)”

Say the words clearly for the child and leave a brief pause between each word.

One repetition may be given. When repeating an item say the three words again and ask again which one doesn't rhyme.

Only give a repetition if the child is slow to respond or looks confused and is not sure what to do.

Make sure the child waits to listen to the three words before picking one up for the clown.

Give all the items in one session. Do not give the child a break during the probe.

Reinforce the child at the end of the probe.

Do not give any corrective feedback during the test items.
