Water quality monitoring

There are many different physical measurements that can be made to assess the various properties of water, most of which are invisible.

What to record or measure:

Site name	
Date and time	
Water depth	(m)
Dissolved oxygen Amo n of air in he a er	(%)
pH S ream a er i all ne ral pH 7	
Conductivity Mea re of di ol ed ion in he a er	
Aquatic plants	(% cover)
Other observations:
